Learning Styles

Short Paper

I've always been aware that I was a visual learner as I'm heavily drawn to imagery and video how-tos. I also figured that I was fairly tactile as it blends well with the visual style, though I was surprised at how high I scored in auditory learning as I struggle with verbal instruction. Learning styles play a huge role in how we interpret and respond to information. Having a well balanced foundation helps students better understand material keeping them confident and motivated. It also helps instructors build efficient programs and adjust to students specific needs.
